

MICS / CICS 6.0 Product Announcement Update

Introduction

The MICS / CICS 6.0 project has established a new General Availability date of November 29, 2002 from the previously published date of September 30, 2002. The new GA date has been identified to allow ample time for sufficient Beta installation and Beta soak to ensure that the Norstar level of quality that our channels and their customers require is met.

The following codes below are affected, and will become available for ordering on November 29, 2002.

Ordering Codes and Price List for: MICS / CICS 6.0, Documentation, Compatible Applications, and Administration

Norstar CallPilot Bundle Offerings

This information provides you with list of the Norstar with CallPilot bundle offerings available for ordering. Each of these bundles has been created to provide sales personnel with competitively priced offerings for new Norstar customers and existing customers that want to upgrade their existing legacy Norstar system. Use these bundles to show customers how they can drive costs out of their business and drive profitability into their business.

Compact ICS/CallPilot 100 Bundles

Targeted at the new Norstar customer in the 2 to 20 station size range, the Compact ICS/CallPilot 100 bundles simplify the selling process for the sales person. Standard offerings in these bundles are Calling

Line ID trunks, Standard software, CallPilot 100, and Basic Call Center. Two different bundle offerings are available based on the end-user's voice messaging needs.
